PROJECT GAPP

Closing the Commitment Execution Gap

Revolutionizing personal and professional follow-through
for better planning, higher trust, and efficient systems.

The Core Problem

"When people say yes... but don't show up."

The Digital Disconnect

Low Stakes, High Waste

Digital platforms have made committing "too easy." 70% of surveyed users find clicking 'Join' or 'Sign Up' requires minimal effort, leading to a culture of non-execution.

GAPP addresses this by building accountability directly into the commitment bridge.

The Organizer's Nightmare

71.4%

Suffer Operational Chaos

The Cost of "Maybe"

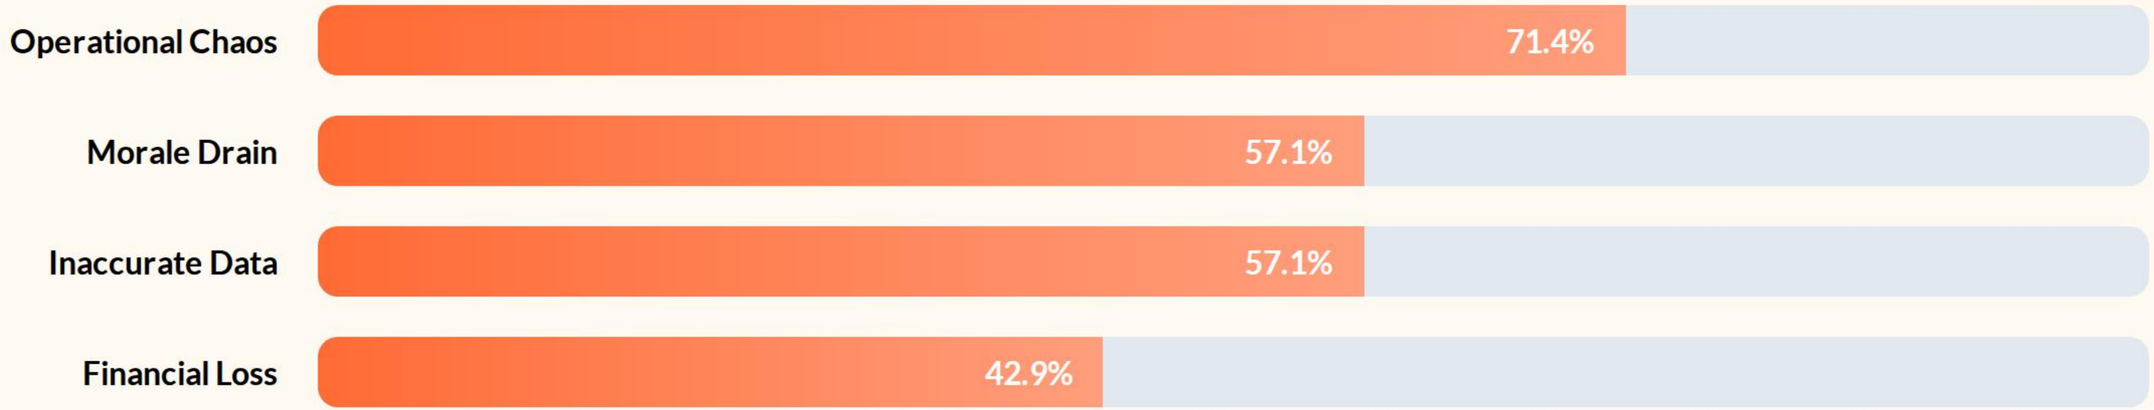
Broken commitments aren't just frustrating; they are destructive to efficiency. Organizers spend 71% of their time re-doing schedules due to no-shows.

- **57%** report team morale drain.
- **43%** face direct financial loss.

Why Users Non-Execute

- **Urgency Over Protocol (50%):** Something more "urgent" came up, highlighting a lack of prioritization tools.
- **No Social Penalty (50%):** Users feel their absence won't be noticed or penalized, reducing the weight of their promise.
- **Memory Gaps (30%):** Users simply forgot, suggesting current reminder systems are ineffective.
- **Time Lag (40%):** The gap between signing up and the actual event was too long to maintain interest.

Impact of Broken Commitments



Data reveals that logistics and planning are the hardest hit by the Commitment-Execution Gap.

The GAPP Solution: "The Fix"

Public Lists

Social accountability through public attendee lists—proven to increase follow-through by 40%.

Stakes

Small refundable deposits ensure users have "skin in the game" before committing.

Intelligent Reminders

Multi-channel SMS and personal messaging to eliminate the "I simply forgot" excuse.

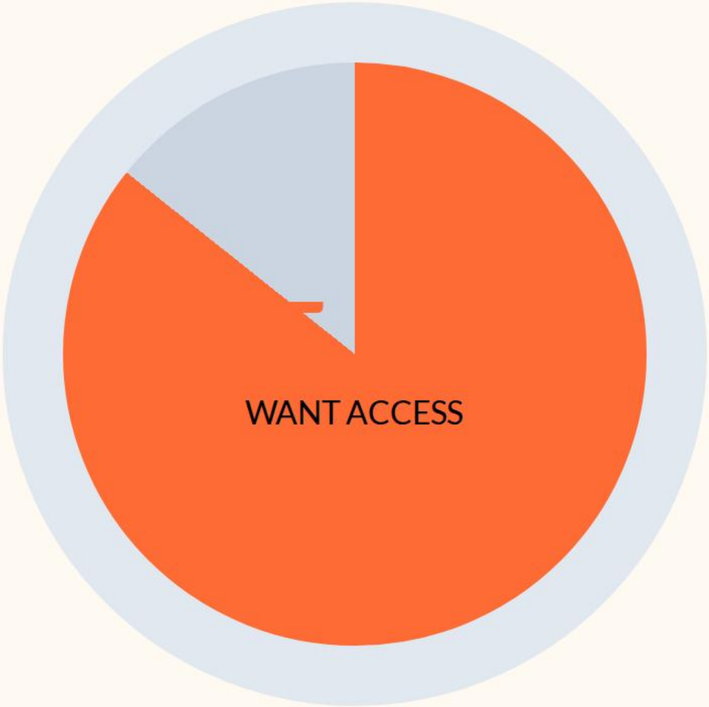
Branding & Identity

Thought Behind the Name

GAPP stands for the bridge we must build. The extra 'P' represents "Performance" and "Progress."

The **Vibrant Orange** color palette chosen for the logo represents action, energy, and the drive to move from a static "Yes" to a dynamic "Success."

High Market Demand



Yes: Ready for Early Access

Maybe: Interested

No:0% Resistance

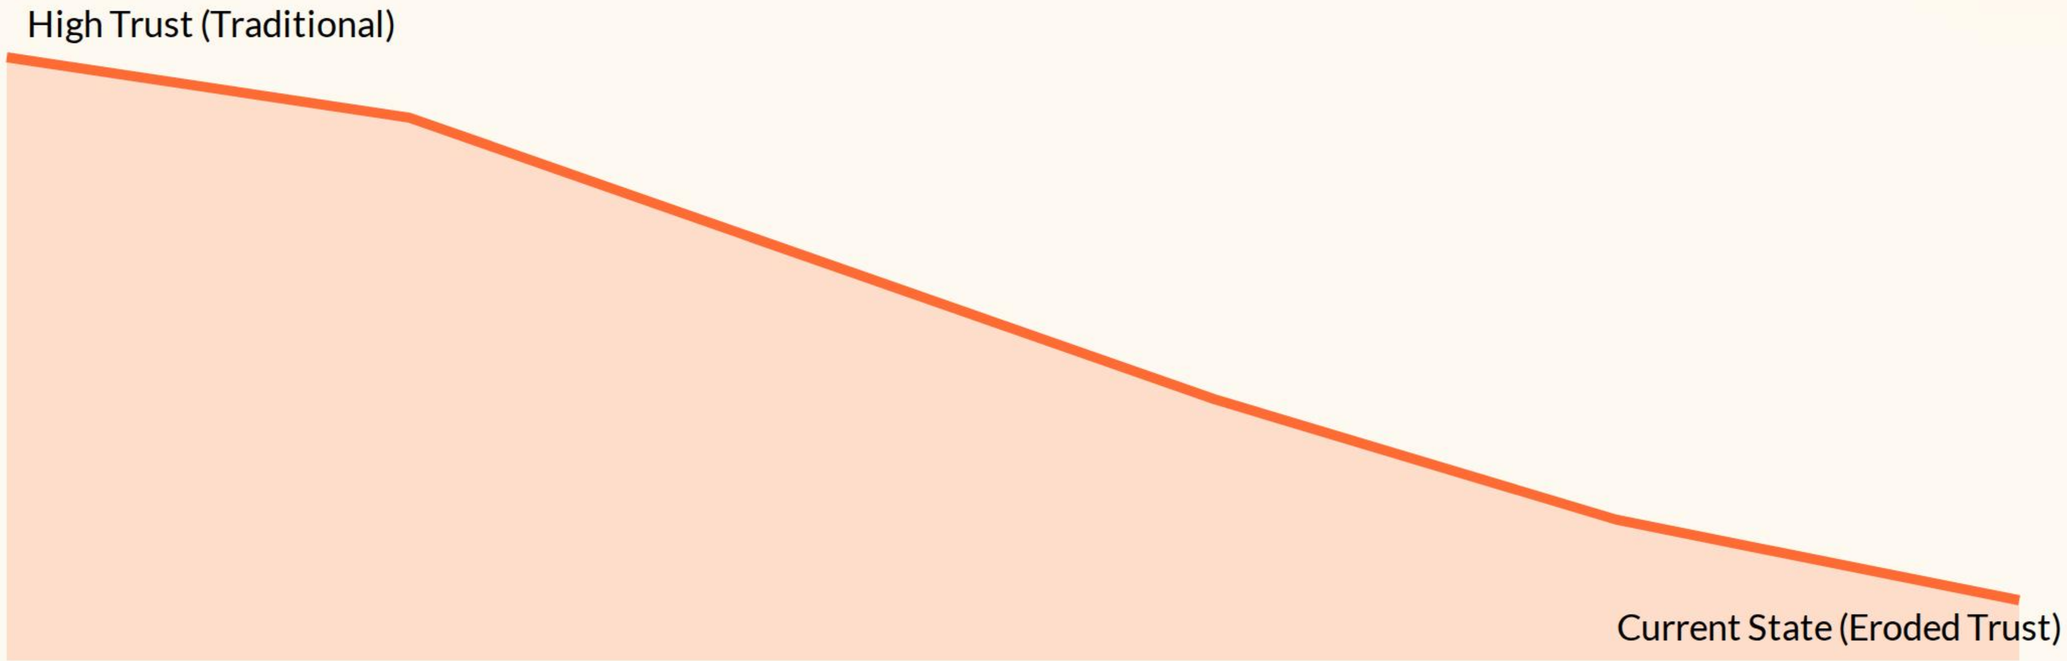
85.7% of respondents want early access to GAPP.

SWOT Analysis

Strengths	Weaknesses
Evidence-based research; High user demand (85.7%); Clear differentiation.	New market entrant; Dependence on user behavior change.
Opportunities	**Threats**
Corporate productivity market; Event management integrations; Higher education adoption.	Existing calendar giants adding "accountability" features; Competitive copycats.

The Erosion of Digital Trust

Trust Level Over Time



Survey indicates a massive trust deficit in standard registration systems (85%+ negative impact).

Questions?

Thank you for your time and attention.
